for Dicotex®

German

Hello,

Here is a brief guide:

Application time:

Dicotex can be applied in the lawn throughout the growing season (April to September)

Effect in spring :

In spring Dicotex against weeds such as autumn crocus or dock works particularly well, there are the plants freshly grown and then particularly sensitive.

Effect in autumn :

The fall application is particularly effective against wild carrot or daisies. These plants are sensitive to Dicotex in the fall.

preparation and revision :

The lawn should be at least 4 days before and 4 days after treatment are not mowed, so enough active ingredients can be absorbed by the weeds.

Dosage:

Watering can (with hot-top): 10 ml Dicotex in 10 liters of water are sufficient for each 10 m² lawn. With the knapsack sprayer:

200 ml Dicotex in 20 l of water are sufficient for 200 m² at max. 1 application 100 ml Dicotex in 10 liters of water sufficient for 100 m² at max. 1 Application 50 ml Dicotex in 5 liters of water sufficient for 50 m² at max. 1 application

English

Hello,

Here is a short guide:

Application time:

Dicotex can be Applied in the lawn Throughout the growing season (from April to September)

Effect in spring:

Dicotex is particularly good for weeds: such as autumnal times or dockers in spring, as the plants are freshly grown and then Particularly Sensitive.

Effect in autumn :

The fall application works particularly well with Wild carrot or daisies. These plants are sensitive in the fall against Dicotex.

Preparation and revision:

The lawn Should not be mowed for at least 4 days before and 4 days after treatment so did enough of the weeds can absorb the active ingredients.

Dosage:

Watering can (with pouring attachment): 10 ml of Dicotex in 10 liters of water are enough for every 10 sqm of lawn.

With the backpack syringe:

200 ml of Dicotex in 20 liters of water are Sufficient for 200 m at max. 1 application 100 ml of Dicotex in 10 liters of water are Sufficient for 100 m at max. 1 application 50 ml of Dicotex in 5 liters of water suffice for 50 m at max. 1 application

Swedish

Hej!

Här är en kort guide:

Ansökan tid:

Dicotex kan appliceras i gräsmattan under hela växtsäsongen (från April till September)

Effect på våren :

Dicotex är särskilt bra för ogräs, som hösttider eller på dockningsstugor våren, eftersom växterna är fräscha och då särskilt känsliga.

Effect på hösten:

Höstanvändningen fungerar särskilt bra med eller Wilder morot tusenskönor. Dessa är växter känsliga under hösten mot Dicotex. Förberedelse och uppföljning:

Gräsmattan ska inte klippas i minst 4 dagar före och 4 dagar efter behandling så att tillräckligt med ogräs kan de absorbera assets ingredienserna.

DOS:

Vattenburk (med hållfasthet): 10 ml 10 liter Dicotex i är vatten tillräckliga för varje 10 m² gräsmatta. Med ryggsäckens spruta:

200 ml Dicotex i 20 liter vatten är för tillräckliga 200 m² vid max. 1 ansökan 100 ml Dicotex i 10 liter vatten är tillräckliga för 100 m² vid max. 1 ansökan 50 ml Dicotex i 5 liter vatten är tillräcklig för 50 m² vid max. ansökan 1
