

11 arwa-twin

11.1 Arrangement according to choice (pat.)

arwa-twin mixer may be arranged lefthand, righthand, in an inclined position or towards the front according to the relevant functional requirements.

The pivoting angle limitation of the outlets (wash basin 90°, sink 160°) are easily adjustable at any time according to the selected arrangement (the instructions are included with each delivery).

11.2 Ball joint (pat.)

Thanks to the arwa-ball joints arwa twin mixers EB may always be mounted exactly in vertical position on the washbasin/sink independent of the position of the mixer seat: vertical (sink) or slightly inclined (ceramic washbasin). Each delivery includes mounting instructions. Inclines of up to $\pm 4^\circ$ can be compensated.
